

Application Home Page Overview

Home - Menu of all your adoptable animals connected right to your PetPoint Database

Favorites - A list of all the animals the user marks as a favorite while browsing your adoptable animals.

Adopt - Currently the adopt button will input the shelters phone number right into the Smartphone making it easy and convenient for the user.

Donate - An easy and quick PayPal donation page with the amounts \$5, \$10, \$20, \$50, \$100 or other amount already in a button form, allowing for quick easy and secure donations right into your shelters PayPal account.

Info - This page is for general information about your shelter, address, phone, hours, mission statement, etc.

Application Features

Android Settings Menu

Pressing your android settings menu will bring up a screen that says "Share App." Pressing this option will bring up a screen with your shelters Pet Adoption Application location information on the Android Market. The screen allows for the user to choose between three different sharing options, a text message, email or a QR code.

The email and text message will automatically put a link to your application right into the text message or email.

The QR code when scanned by another Smartphone will take the user automatically to your application on the Android Market.

Your Logo/Header on every page of the Application

Long pressing this on your Smartphone will bring up three different icons, a phone, email and map.

Pressing the map will take the user to a Google map of where your shelter is located.

The email will put the contact email of your choice into the send to section of the users email.

The phone icon will input your shelter number into the users Smartphone making it extremely easy for them to get in contact with your shelter.
